Boardroom Radio Broadcast – Significant New Resources at Henry George and 11:30 Deposits in Broken Hill

Perilya Limited (ASX code: PEM) is pleased to provide the opportunity to listen to an audio broadcast with Mr Bruce Hooper, General Manager Exploration, and Boardroom Radio in a presentation providing details of today's announcement on two new significant resources at Henry George and 11:30 Deposits in the Pinnacles region in Broken Hill, NSW which were released to the ASX today. These new resources follow the recent success at the company's Flying Doctor Deposits in Broken Hill, and also at the Mt Oxide copper project in Mt Isa, Queensland.

Background to Perilya

Perilya Limited is an ASX 200 Australian base metals mining and exploration company. Perilya is investing substantially in the development of its three major projects located in the Broken Hill, Mt Isa and Flinders regions as well as exploration in the surrounding tenements.

The company is expanding its operations at the iconic Broken Hill mine through the development of an exploration decline at Potosi, re-developing the North mine and evaluating the development of an open mine at the Flying Doctor deposit and conducting exploration within a ten kilometre radius of the concentrator.

The Company is also targeting early development of its 203,000 tonne Mount Oxide (contained metal) copper project in the Mt Isa region in Queensland.

The company is also investing in the development of the Flinders zinc silicate project in South Australia, with approximately 108,000 tonnes of contained zinc stockpiled from its Beltana deposit and evaluating development of nearby deposits including the Reliance deposit.

Perilya has a strong balance sheet with low debt levels and is actively seeking growth through a proposed merger with CBH Resources Limited.
