

SHIFT SUPERVISOR

Reporting to the Mining Superintendent, the Shift Supervisor will be responsible for the management of people, information and equipment to ensure safe and efficient operations.

Key responsibilities will include:

- Monitor all aspects of operations safety within the underground work area and report on specific safety issues.
- Achieve agreed performance goals in safety, environment and production.
- Management and Supervision of personnel performance, training and development.
- Actively promote adherence to the operations schedule.
- Manage and monitor the performance of drill and blast sites, identifying any issues that may occur.
- Uphold operations standards and identify and resolve issues in a timely manner.
- Assist with the implementation of strategies for controlling, optimising and improving the efficiency of the operations.
- Co-ordinate and achieve operation objectives.
- Ensure all relevant documentation such as logs and reports are completed in a timely and efficient manner and to the agreed standard.
- Maintain a close working relationship with all departments within the business.

To be successful in this role you will have a minimum of five years operational experience (functional-mining), excellent communication and leadership skills and demonstrate an ongoing commitment to safe work practices. It is critical that you have experience with explosive management as this position will be responsible for overseeing the day to day blast activities and personnel. You must therefore have the ability to gain a security clearance for handling explosives. A BEUL is also desirable although not essential.

Essential to the position is a NSW or WA Underground Supervisors Ticket (or higher) and an understanding of all key processes that impact upon mining operations, including the interaction that occurs between differing parties. Excellent written and verbal communication skills are crucial along with high computer literacy skills. Spanish language skills while not essential will be advantageous.

The ideal candidate has a Certificate IV in Metalliferous Mining Operations (Underground). A First Aid Certificate is also required. Those with a certificate in Frontline Management and other management qualifications are also encouraged to apply.

This is a **residential** role that includes an attractive remuneration package including base salary, superannuation and private health cover.
